White Gardens

Today on Gardening in a Minute: white gardens.

Themed areas can add a unique element to any landscape, and white gardens are an elegant option.

For your white garden, choose plants with different textures and heights for visual interest.

Select flowering plants that bloom at different times of the year, so you’ll have a gorgeous garden year-round.

Some favorite plants for Florida white gardens are camellia, azalea, oakleaf hydrangea, jasmine, and dogwood.

White flowers are always beautiful, but don’t forget plants with white variegated foliage, such as caladium, Aztec grass, and variegated pittosporum.

You can incorporate white structural elements, like arbors and trellises, into your white garden to complete the theme.

Perhaps the best part about white gardens is how romantic they look in the moonlight!

For more information about white gardens, contact your county Extension office or visit Gardening in a Minute dot com.

Gardening in a Minute is a production of the University of Florida’s Center for Landscape Conservation and Ecology, IFAS Extension, and WUFT-FM.
