:30 Public Service Announcement

Firewise Landscaping

Wildfire is always a threat in Florida, especially during dry periods.

You can reduce your wildfire risk by making some changes to your landscape. Remove vines from trees and trim lower branches from tall trees.

To help prevent the spread of fire to your home, maintain space between groups of plants. Keep combustible items like wood piles and gas grills at least thirty feet from your house, and clean up dead leaves and branches.

This public service announcement is brought to you by Gardening in a Minute. For more information about drought, visit Gardening in a Minute dot com or contact your University of Florida IFAS county Extension office.

The Conserving Water: Solutions for Your Landscape campaign was developed by the Center for Landscape Conservation and Ecology.

Special thanks goes to Dr. Michael Dukes, Dr. Laurie Trenholm, Dr. Sydney Park Brown, St. Johns River Water Management District, Southwest Florida Water Management District, and South Florida Water Management District.
