## Conserving Water in the Landscape

Water conservation is especially on people's minds during dry periods, but it's important all the time.

One place to save water is in the home landscape. Irrigate in the early morning hours and apply no more than three-quarters of an inch of water.

Make sure your irrigation system is working properly and isn't leaking. Remove weeds when you see them, keep fertilizing to a minimum, and water grass only when it starts to wilt.

This public service announcement is brought to you by Gardening in a Minute. For more information about water conservation, visit Gardening in a Minute dot com or contact your University of Florida IFAS county Extension office.

---

The Conserving Water: Solutions for Your Landscape campaign was developed by the Center for Landscape Conservation and Ecology.

Special thanks goes to Dr. Michael Dukes, Dr. Laurie Trenholm, Dr. Sydney Park Brown, St. Johns River Water Management District, Southwest Florida Water Management District, and South Florida Water Management District.
