:30 Public Service Announcement

Drought-friendly Landscaping

Most of Florida is experiencing drought conditions this year, although some areas are hit harder than others.

The state's five water management districts can restrict landscape water use in times of shortage, and yours may already have.

Water restrictions apply to everyone, even people who get their water from wells. Pay attention to local news and visit your water management district's Web site to find out what water restrictions impact your area.

This public service announcement is brought to you by Gardening in a Minute. For more information about water conservation, visit Gardening in a Minute dot com or contact your University of Florida IFAS county Extension office.

The Conserving Water: Solutions for Your Landscape campaign was developed by the Center for Landscape Conservation and Ecology.

Special thanks goes to Dr. Michael Dukes, Dr. Laurie Trenholm, Dr. Sydney Park Brown, St. Johns River Water Management District, Southwest Florida Water Management District, and South Florida Water Management District.
