:30 Public Service Announcement

Watering Your Lawn

Help your grass make it through dry periods by encouraging it to grow deeper roots. Water your lawn only when it shows at least one of the three signs of wilt. Look for leaf blades that fold in half lengthwise, a blue-green color, or footprints that stay visible.

Irrigate your lawn only when at least a third of it shows one or more of these signs. Apply one-half to three-fourths of an inch of water at a time.

This public service announcement is brought to you by Gardening in a Minute. For more information about water conservation, visit Gardening in a Minute dot com or contact your University of Florida/IFAS county Extension office.

The Conserving Water: Solutions for Your Landscape campaign was developed by the Center for Landscape Conservation and Ecology.

Special thanks goes to Dr. Michael Dukes, Dr. Laurie Trenholm, Dr. Sydney Park Brown, St. Johns River Water Management District, Southwest Florida Water Management District, and South Florida Water Management District.
