:30 Public Service Announcement

## Provide Water to Wildlife

Drought isn't just tough on people. It can be stressful for animals, too. Do your part to help wildlife survive by providing a water feature.

Birdbaths should be shallow, with textured bottoms and gently sloped sides. Keep them clean with a plain textured sponge.

Shallow plant saucers make perfect butterfly watering stations.

Small ponds attract a variety of wildlife. Add plants and see who comes to the watering hole!

This public service announcement is brought to you by Gardening in a Minute. For more information about drought, visit Gardening in a Minute dot com or contact your University of Florida/IFAS county Extension office.

---

The Conserving Water: Solutions for Your Landscape campaign was developed by the Center for Landscape Conservation and Ecology.

Special thanks goes to Dr. Michael Dukes, Dr. Laurie Trenholm, Dr. Sydney Park Brown, St. Johns River Water Management District, Southwest Florida Water Management District, and South Florida Water Management District.
